WIVOZA · PILOT REPORT

Maple Ridge Academy

September 12, 2026 – September 18, 2026

SAMPLE REPORT · INVENTED SCHOOL

AT A GLANCE

- 17 of 24 teachers (71%) used Wivoza in this period, and 13 came back from the period before.
- Since focusing on talk time balance on September 1, it has gone from 43% of recorded lessons to 22%.
- Clearest staff strength: clear directions, 100% of lessons included at least one clear, specific direction.
- Suggested next focus: higher-order questioning, which came up in 20 lessons across 9 teachers.

1 Adoption

How many of your staff are using Wivoza, and whether they keep coming back.

LICENSED STAFF	ACTIVATED	ACTIVE THIS PERIOD	CAME BACK
24	**21**	**17**	**13**
Teachers with an account	88% finished setting up	71% of staff used it in these dates	Active this period and the one before: the habit signal

64 coaching activities in these dates, up 13 from the period before. In practice scenarios, 67% of responses were strong, compared with 33% the period before. Ratings are private to Wivoza and never shown per teacher.

2 How Teachers Used It

How many teachers have used each part of Wivoza, and how often.

Lesson Debrief Record a lesson, get private feedback on it	**21 teachers** · 76 lessons analyzed
Talk It Through Talk a problem out loud with the coach, any time	**16 teachers** · 28 conversations
Practice Rehearse a classroom moment or a hard conversation	**17 teachers** · 42 rehearsals and reflections
Planning Coach Build or improve lessons, slides and assignments	**14 teachers** · 31 plans, slide reviews and assignment reviews
Build a Lesson	9 teachers · 12
Improve a Lesson	5 teachers · 6
Review Slides	3 teachers · 4
Review an Assignment	6 teachers · 9
Communication Coach Messages home, meetings, and a second read	**18 teachers** · 30 messages, meeting preps and reviews
Write a Message	11 teachers · 14
Prepare for a Conversation	7 teachers · 9
Review My Communication	5 teachers · 7

3 What We Worked On

The school-wide focus areas you tracked, and whether they're showing up in fewer lessons.

Talk time balance

Tracked since September 1 · The teacher did 65% or more of the talking.

WHEN YOU STARTED

In 43% of lessons (13 of 30)

SINCE THEN

In 22% of lessons (10 of 46)

Down 21 points since you started — it's showing up in fewer lessons.

PD: A short PD session on structuring more student talk time — think-pair-share, cold-call routines

The share of recorded lessons where this was the main area to grow. Lower is better: fewer lessons need it.

4

What the Classrooms Show

School-wide averages from recorded lessons, never one teacher's, in the order teachers see them: Talk & Participation, Questioning & Checking, Climate & Routines.

LESSONS ANALYZED

76

Recorded by teachers, for their own feedback

TEACHER TALK

59%

Share of the lesson. 65%+ in a lesson is flagged.

SPEAKING PACE

—

Everyday conversation usually runs about 120–160. A range, not a target.

WAIT TIME

2.7 s

After a question. A good sign: 3s or more.

PAUSE AFTER AN ANSWER

—

Before the teacher speaks again. It is where a follow-up has to fit.

POSITIVE TONE

82%

Above 50%: more encouragement than correction.

SHARED STRENGTHS

Clear directions: 100% of lessons included at least one clear, specific direction.
Checks for understanding: 99% of lessons included at least one check for understanding.
Real-life examples and connections: 66% of lessons connected the content to real life or earlier learning.

MOST COMMON GROWTH AREAS

Talk time balance: 23 lessons, 14 teachers. The teacher did 65% or more of the talking.
Higher-order questioning: 20 lessons, 9 teachers. Fewer than 4 in 10 questions asked students to explain, compare or reason.
Wait time after questions: 11 lessons, 8 teachers. Students got under 3 seconds to think before someone answered.

BY GRADE & SUBJECT · ALL LESSONS TO DATE	TEACHER TALK	WAIT TIME	BEYOND RECALL
Grades 6-8 11 teachers	61%	2.6s	—
Grades 9-12 10 teachers	57%	2.8s	—
STEM 9 teachers	58%	2.7s	—
Humanities 8 teachers	60%	2.8s	—
Other 5 teachers · Arts, World languages combined	55%	2.9s	—

Read across a row to see where a need is concentrated. Lower teacher talk, and higher wait time and more questions beyond recall, are the good directions. Groups under 5 teachers are combined so no one can be singled out.

5

Where Teachers Are Focusing

The growth goal each teacher chose for themselves — where PD can meet them.

Your share of the talk	**7 teachers**
Questions beyond recall	**4 teachers**
Avg. wait time	**3 teachers**
Checks for understanding	**2 teachers**
Redirection language	**2 teachers**

A focus only one teacher chose is counted under “other”, so no one is identified by their choice.

6 Recommended Next Step

The most common growth area the school isn't working on yet.

Higher-order questioning

Came up in 20 lessons across 9 teachers. Fewer than 4 in 10 questions asked students to explain, compare or reason.

Suggested PD: A 15-minute micro-PD on higher-order question stems (why / explain / compare / justify).

Generated by Wivoza · wivoza.com · Anonymous by design: no teacher's recordings, conversations or ratings are included, and groups with fewer than 5 teachers are combined.
